

# *Extending advanced telecommunications services to the four corners of the world*

For well over a decade, American Educational Telecommunications (AET) has pioneered breakthrough innovations in telemedicine, broadcast medicine, and distance learning. AET's delivery of healthcare, health education and broadcast medicine to the world's most remote areas is unprecedented in scope and reach. Today, AET is leveraging these emerging "tele-technologies" to offer truly mobile audio/visual communications services to a vast array of enterprises. In case after case, these custom solutions can significantly reduce the cost of delivering quality telecommunications/education, healthcare and monitoring to remote locales and their providers.

#### **Taking Telecommunications to the Next Level**

- Telemedicine
- Distance disaster relief
- Tele-behavioral health
- Tele-psychiatry
- Tele-sleep studies
- Tele-pharmacy
- Tele-dentistry
- Rural clinic/rural hospital
- ER/Trauma
- Nursing home
- Prisons
- And many more

#### **Making the Grade in Tele-Education**

- CME lectures
- Health information & education via voice, video, television and Internet
- Specialized content serving specific industries
- Real-time lectures in HD over encrypted internet connection
- Digital Signage

#### **Closing the Gap in Telecommunications Technology**

- Advanced video conferencing
- Traditional Telemedicine Solutions
- Totally mobile hand-held wireless cameras
- One-way video or instantaneous snapshots via Internet
- Live, on-screen drawings via "telestration"
- Internet communication via wireless, cell tower or fast Ethernet cable
- Video and snapshot data stored on PC application/camera for EMR

#### **AET Comprehensive Services**

- AET Capability Demonstrations
- On-Site Evaluations
- Specific Needs Solutions
- No-Obligation Proposals
- Financial Benefit Analysis
- Comprehensive Installation & Training
- Workflow and Procedures Assistance
- Billing/Coding Assistance in Telemedicine
